CAL OES ACTIVATIONS

Cal EOC Incident – 2014 Drought

- The SOC is activated at Level 2 in support of the Drought State of Emergency from 0800-1700 hours daily.
- The Inland REOC is activated at Level 2 from 0800-1700 Monday through Friday or as needed.
- The Southern REOC is activated at Level 1.
- The Santa Barbara County OA EOC is activated at Level 2 to be handled by the duty officer for the purpose of monitoring activities and gaining situational awareness. The operational period is Monday – Friday, 0800-1700 hours.

Situational Summary

On January 17, 2014 Governor Edmund G. Brown proclaimed a State of Emergency and directed state officials to take all necessary actions to prepare for drought conditions. The State Operation Center (SOC) is activated to implement objectives in support of the Governor's priorities. The lack of winter rain and snowfall has resulted in extremely dry conditions in many parts of the State. Reservoir levels are down significantly from where they should be on average for this time of year. If conditions continue severe impacts to municipal water supplies, agriculture (plants and livestock) and firefighting capabilities are likely in store for the State over the next few months. Negative economic impacts will also result.

The drought could result in severe impacts to the municipal water supplies, wells, agriculture (plants and livestock) and firefighting capabilities for several months. The SOC continues to be activated to monitor the situation statewide, and support regional and local operational areas.

- Current Reservoir Levels continue to decline. Levels as of August 18th : Don Pedro 42%; Exchequer 18%; Folsom Lake 40%; Lake Oroville 33%; Millerton Lake 47%; New Melones 24%; Pine Flat 12%; San Luis 20%; Lake Shasta 32%; Trinity Lake 31%; Pyramid Lake 94%; and Castaic Lake 44%.

- Emergency Drinking Water Procurement and Distribution Planning Guidance (rev. May 2014)
Significant changes have occurred to the structure of California's state government organization. Rapid advances in systems, science, and technology have helped emergency managers improve coordination, forecasting, and situational awareness. Because of these changes, the *Multi-Agency Emergency Response Procedures for Potable Water Procurement & Distribution* document has been replaced by the *Emergency Drinking Water Procurement and Distribution Planning Guidance*. The intent of this guidance document is to clarify the roles and responsibilities of the stakeholders involved in locating, procuring, and delivery of emergency drinking water¹ to populations in California. Consequently creating a framework for agencies and organizations to work together to enhance preparedness.

Situational Summary

- State Board Mandatory Conservation Regulations Now in Effect: The state's first-ever emergency regulations mandating urban water conservation became effective will be in effect until April 25, 2015.
http://www.waterboards.ca.gov/waterrights/water_issues/programs/drought/emergency_regulations_waterconservation.shtml
- The 2014 Governor Drought Task Force continues to meet regularly to take actions that conserve water and coordinate state response to the drought.
- Cal OES continues to gather drought-related costs from state agencies and local governments.
